STRATEGIC PRIVATE CLOUD

WHAT IS IT?

Strategic Private Cloud is a locally-based data center implementation offering designed to help enterprises efficiently and effectively incorporate cloud-based services into their IT architectures to support storage, virtualization, and application delivery requirements.

Whether your company is growing in terms of revenue, employees, software applications, or data storage requirements, Strategic Private Cloud offers the most cost-effective and reliable way to scale your technology resources and keep up with the growth

THE BENEFITS OF DEPLOYING CLOUD SERVICES INCLUDE:

- **COST SAVINGS**
  Reduce upfront costs; eliminate large upfront capital expenses.
- **INCREASED AVAILABILITY / UPTIME**
  Access your resources whenever you need them, 24 x 7 x 365.
- **SCALABILITY**
  Easily scale to fit fluctuations in staffing, software, and data store requirements.
- **RAPID DEPLOYMENT**
  Easily spin up a new server from an existing template.
- **ACCESSBILITY**
  Access your Infrastructure-as-a-Service (IaaS) from anywhere on the Internet.
- **COMPATABILITY**
  Highly compatible with just about any technology.

Strategic helps you design, deploy, and implement cloud services the right way for your business. Once implemented, your highly customized Strategic Private Cloud is easily managed and controlled to meet your growing and changing requirements, which means the time spent on daily IT administration is significantly reduced.

WHY DO IT?

Strategic Private Cloud offers clients the opportunity to reduce costs, eliminate time spent on daily IT administration, and scale technology resources to accommodate business growth and reduce risk.

FEATURES

- 24 x 7 x 365 Uptime
- Fully Redundant Cisco UCS, VMware, and EMC Environment
- Application / Issue Management
- Proactive Problem Resolution
- Scalability
- Easy to Manage
- Top Level Security Features
- Redundant Power
- Redundant Network
- Redundant Computing Resources
- Locally Based
- Download Large Locally Stored Files in Seconds
- HIPAA Compliant
- PCI Compliant
- "Best in Breed" Technologies
- Credentialed Cloud Architects
- Exhaustive Design Process

BENEFITS

- Eliminates On-Site Hardware (e.g., servers)
- Reduces Costs and Hassles
- Drastically Reduces Time Spent on Daily IT Administration
- Increases Data Availability
- Increases Retrieval Speed
- Offers 100% Uptime
